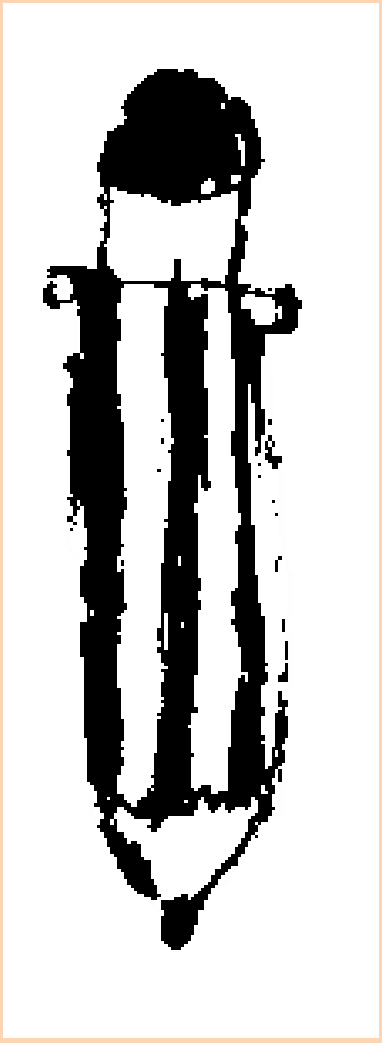
School Voices Survey

– I learn best when...

[N.B. this was presented with MS PowerPoint animations, which are not available in PDF format]

Most of the pictures in this presentation were drawn by the students at [regional intermediate decile 3] School!

Including this one



Who are we?

- **New Zealand has a Commissioner for Children.**

- **His name is Dr Russell Wills and his job is to make sure all children in New Zealand are treated well and have their rights met.**

- **Russell wants children to have a say in things that affect them, and for grown-ups to listen to them.**
- **One of the ways he does this is to ask**

What was the survey about?

- In May this year we asked you what helps you to learn best.
- We have focussed on the top 5 topics raised by 80% of students (36 of 45 students).

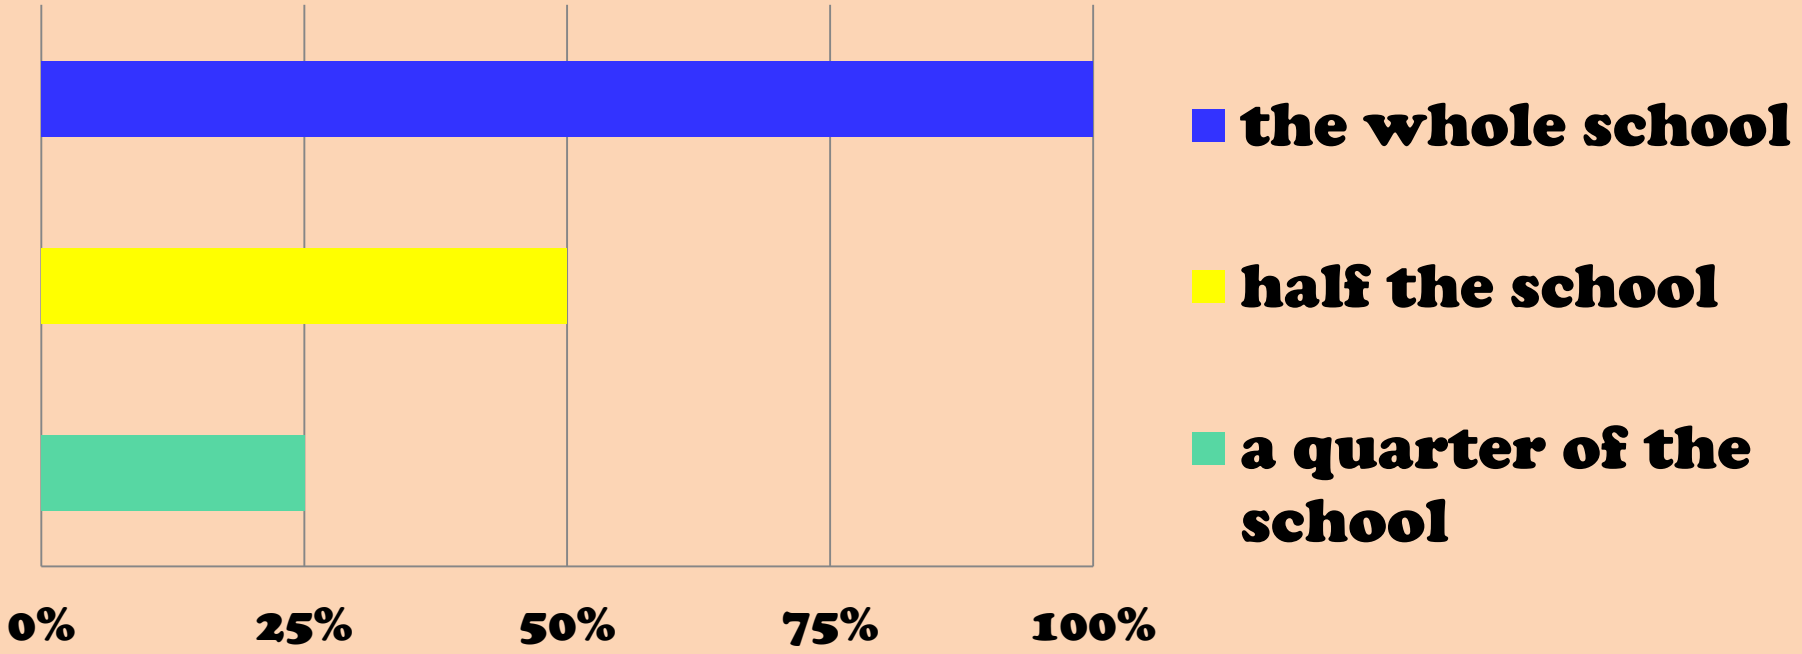
What is a percentage?

This is a whole pizza
It is 100% there!

Half has been eaten.
There is 50% of the pizza left

1/4 is 25%

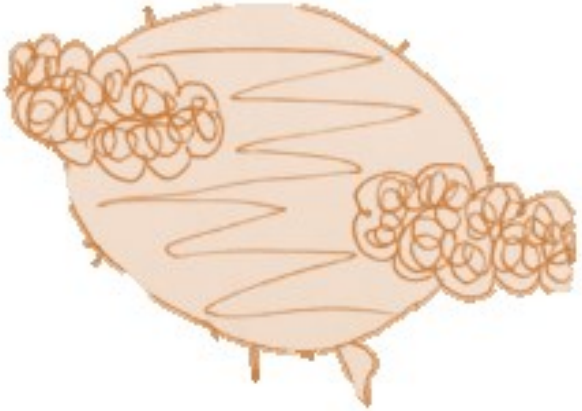
You can also show a percentage on a graph...

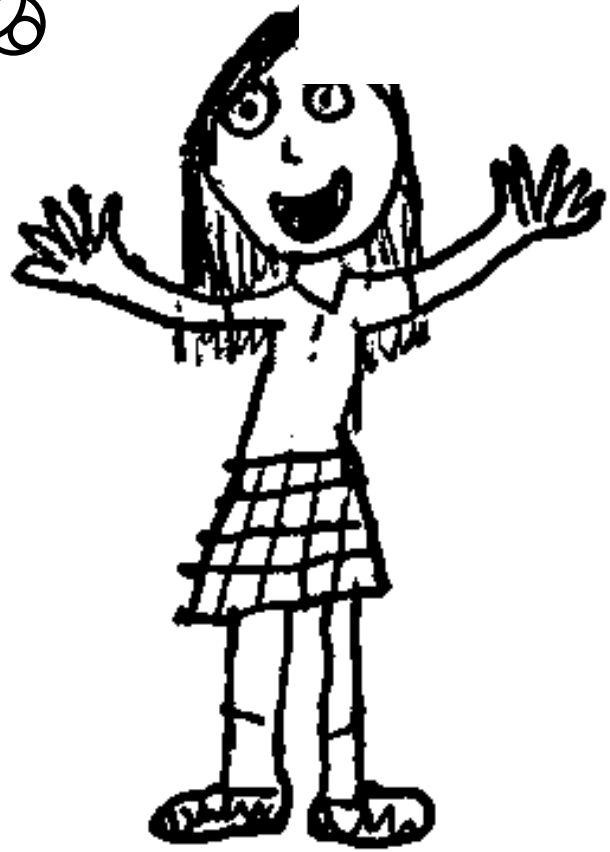


Almost half of you (47%) told us that you learn best when you are working with others

Over a quarter of you (30%) said that you learn best when it's quiet...

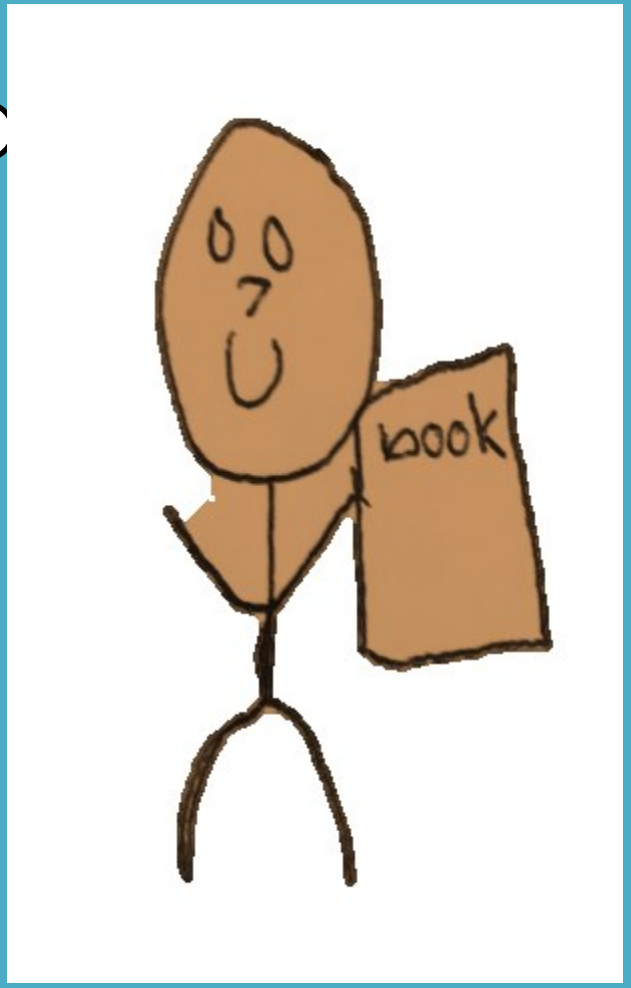
Almost one in five students (19%) told us that you learn best when you are happy.





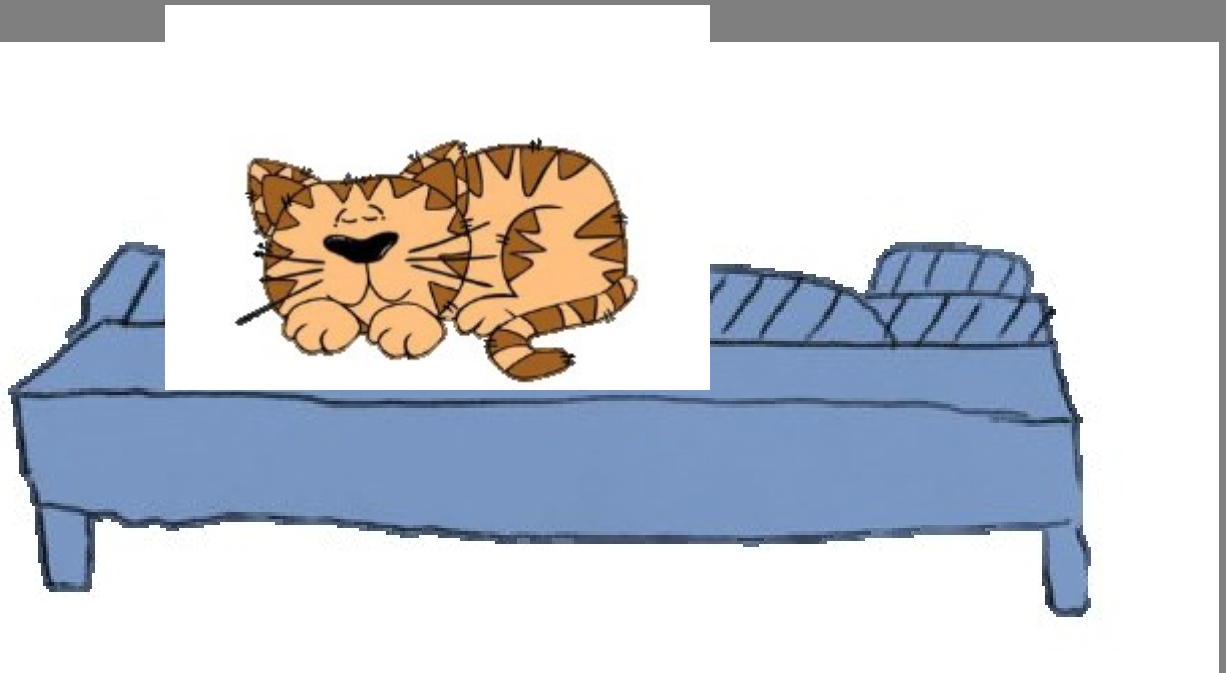
Almost 20% of you said that you learn best when you are using technology

And 20% also said that you learn best when you understand what you are doing.



Here are some other answers you gave us that we wanted to share with you...

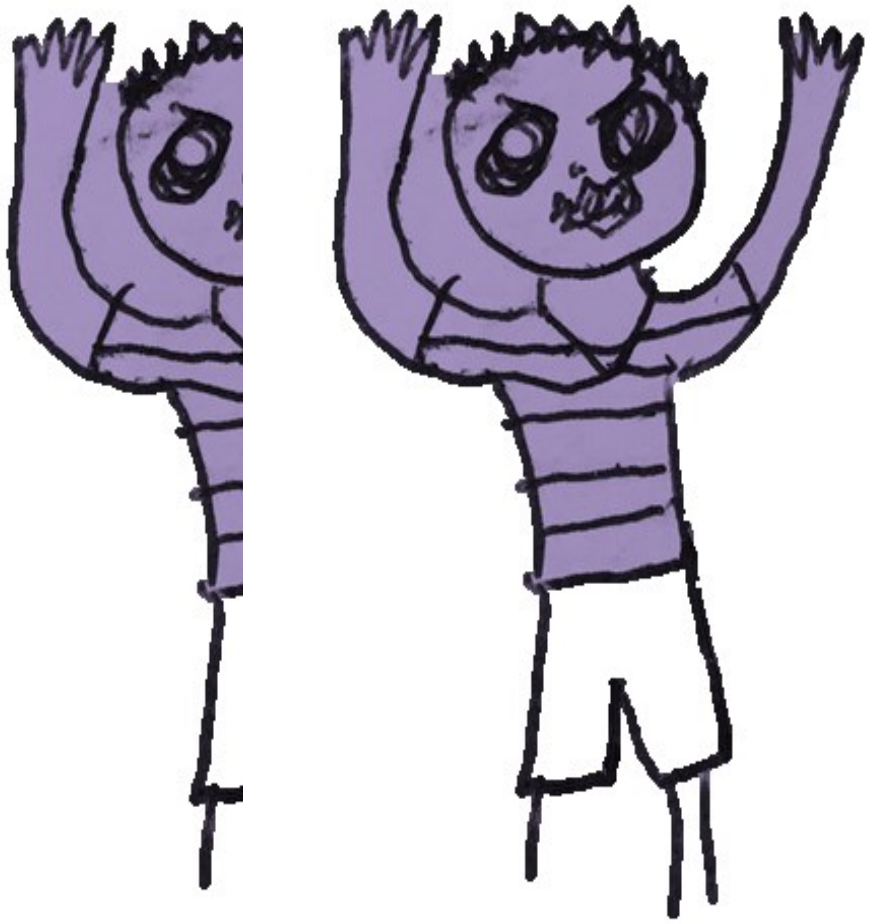
I learn best when I've had a good nights sleep.



I learn

I learn best when
I'm not hungry

I learn best when my teachers aren't grumpy or other people aren't grumpy



Key thoughts

Where to from here?

Thank you [regional intermediate decile 1] !
